

Huntington disease is a fatal, hereditary brain disorder.

Huntington disease is an inherited brain disorder which is genetic in nature. Approximately **1 in every 5,500 Canadians** are at-risk of developing the disease. It is like experiencing the symptoms of ALS, Parkinson's and Alzheimer's **simultaneously.**

Huntington disease
AFFECTS GENERATIONS.

**EVERY CHILD born to a
parent with HD has a
50% chance of sharing
the same fate.**

But there is HOPE

Incredible research is being funded by HSC to find a meaningful treatment for Huntington disease.

HSC strives to:

- Maximize the quality of life of people living with HD by delivering services
- Further research to slow and to prevent HD
- Enable others to understand the disease

**Right now, every dollar
makes a difference.**
